

New BT- 30 Dual Contact (Face and Tape) product range specially designed for high speed and high accurate machining processes, including:

- ❖ Shrink Fit Chucks
- ❖ Shell End Mills
- ❖ Front Contact Adapter
- ❖ High Power Torque Chuck
- ❖ High Precision Collet Chuck **"ZentroLaip"**

"It is designed to reduce vibrations and thus improve the surface finish in high speed machining. We have managed to manufacture a high precision collet chuck with a run-out less than 3 microns at 3 times the diameter"
